

# Property Management Systems

Your property management system (PMS) is the the front desk and central hub of your hotel's operations, processing everything from reservations and guest information to check-in and check-out times.

The SiteMinder cloud platform for hotels automates inventory and rate updates from your PMS to keep all booking sites updated with real-time availability and eliminates manual entry.

Real-time integration with the world's leading PMSs keeps everything in sync and lowers your cost of acquisition.
